ABSTARCT

Company Visitor Management System deals with the security provided at company premises from the unauthenticated or unwanted visitors.

Nowadays, in most organizations Visitor management consists of visitors scribbling their name in a paper book.

Instead, Company Visitor Management System will assist you the professionalized way in which you welcome your visitors. This software is a complete Visitor Management service to improve the efficiency, productivity, security.

INTRODUCTION

In this we mentioned the software and hardware requirements, which are necessary for successfully running this system. The major element in building systems is selecting compatible hardware and software. The system analyst has to determine what software package is best for the “**Online Company Visitor Management System**” and, where software is not an issue, the kind of hardware and peripherals needed for the final conversion. Company Visitor Management system is a web-based technology that will revolutionize the way your company manages visitors. Visitor Management system is more important to security guards or security company. This web application provides a way to effectively control record & track company visitor traffic. In CVMS we use Python Django and Sqlite database. This is the project which keeps records of visitors who visited in the company.

PROBLEM STATEMENT

In present all visitor work done on the paper. The whole year visitor is stored in the registers.

We can't generate reports as per our requirements because its take more time to calculate the visitors report.

OBJECTIVE

- The purpose of developing company visitor management system is to computerized the tradition way of visitors.
- Another purpose for developing this application is to generate the report automatically.
- reduce paper work
- Provide accuracy

FUTURE SCOPE

This web application involves almost all the basic features of the online company visitor management system. The future implementation will be online help for the visitors and chatting with website administrator.

OUTCOMES

Following are the aim of project:

- Secure system by providing admin login.
- Easily manage record
- No chances of loss Information

SOFTWARE /HARDWARE REQUIREMENTS

- **Software Requirement Specifications:**

For development:

PyCharm

SQLite Database

For Testing

Selenium IDE –

Selenium IDE (Integrated Development Environment) is primarily a record/run tool that a test case developer uses to develop Selenium Test cases. Selenium IDE is an easy-to-use tool from the Selenium Test Suite and can even be used by someone new to developing automated test cases for their web applications. One does not require any special setup to get started with Selenium IDE. You just need to add the extension of your specific browser. Selenium IDE provides you with a GUI (Graphical User Interface) for easily recording your interactions with the website.

- **Hardware Requirement Specification**

Intel Pentium Processor

32 MB RAM or higher

1.2 GB Hard Disk or greater

SYSTEM DESIGN

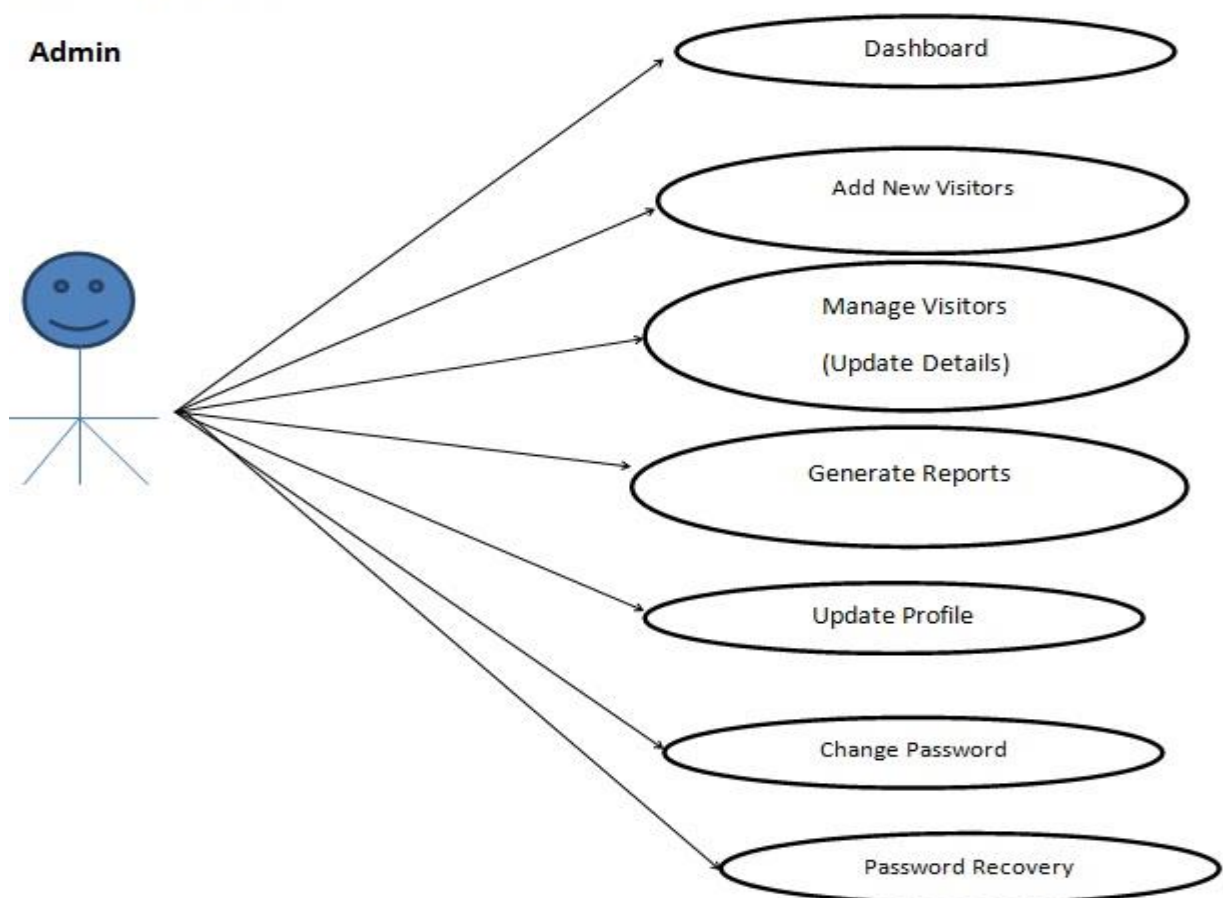

- Use case diagram
- Class Diagram
- Sequence Diagram
- Data flow diagram

Use Case Diagram:

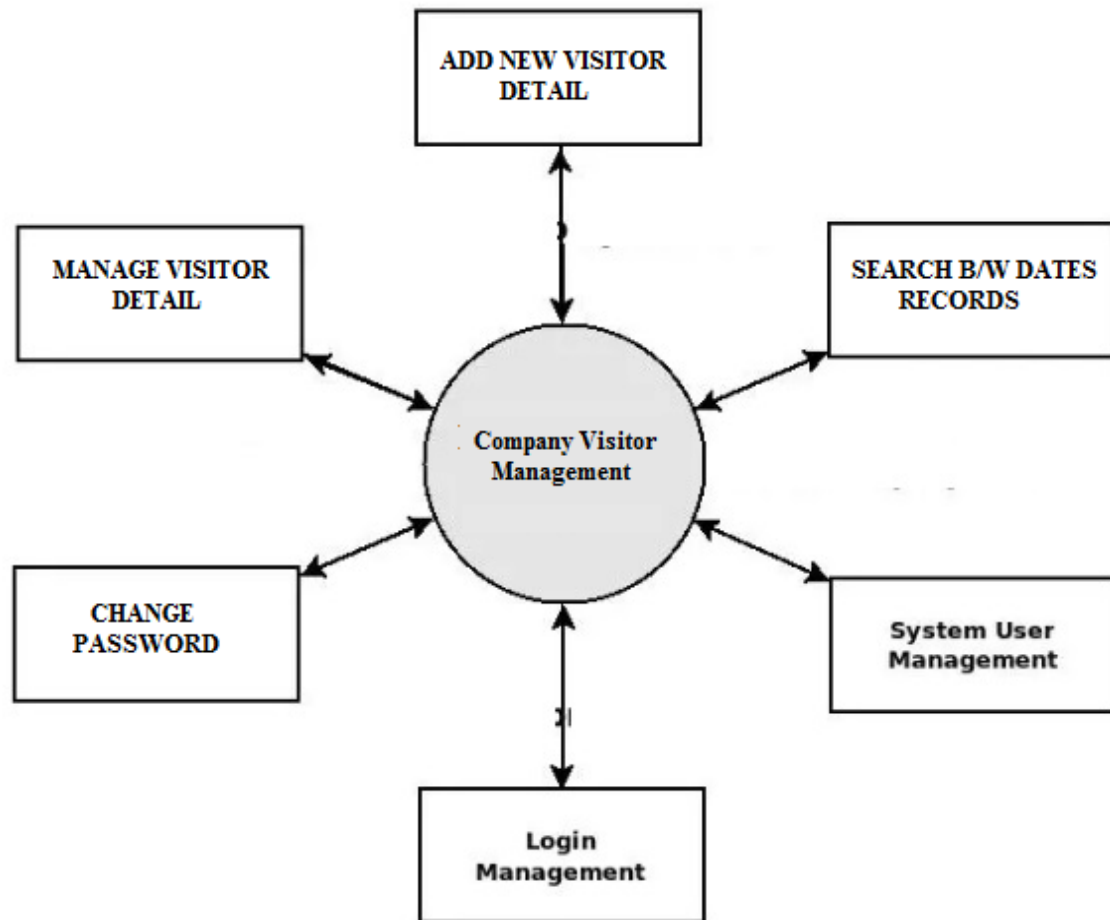

- Use case diagram consists of use cases and actors and shows the interaction between them. The key points are:
- The main purpose is to show the interaction between the use cases and the actor.
- To represent the system requirement from user's perspective.
- The use cases are the functions that are to be performed in the module.

Use Case Diagrams:

TEST PLAN

Sr. No.	Test class	Description	Expected Result	Actual Result
1	Admin login	Ensures Admin login page open	Page should open and Admin Login should be done successfully	Page open and Login duone successfully

TEST STRATEGY

Admin Login

Test case Id	Test case objective	Steps	Input	Expected Result	Actual Result	Status
TC-1	Login the admin portal	Click on login button	Username:admin Password:1234	Login succesfully	Login succesfully	PASS
TC-2	Add Customre	Click on add button	Details	Add succesfully	Add succesfully	PASS
TC-3	Edit Visitor	Click on Edit Button	None	Edit should be done succesfully	Edit done succesfully	PASS
	Check for the Search	Click on Search	Date	Visitor shpuld be	Search	PASS

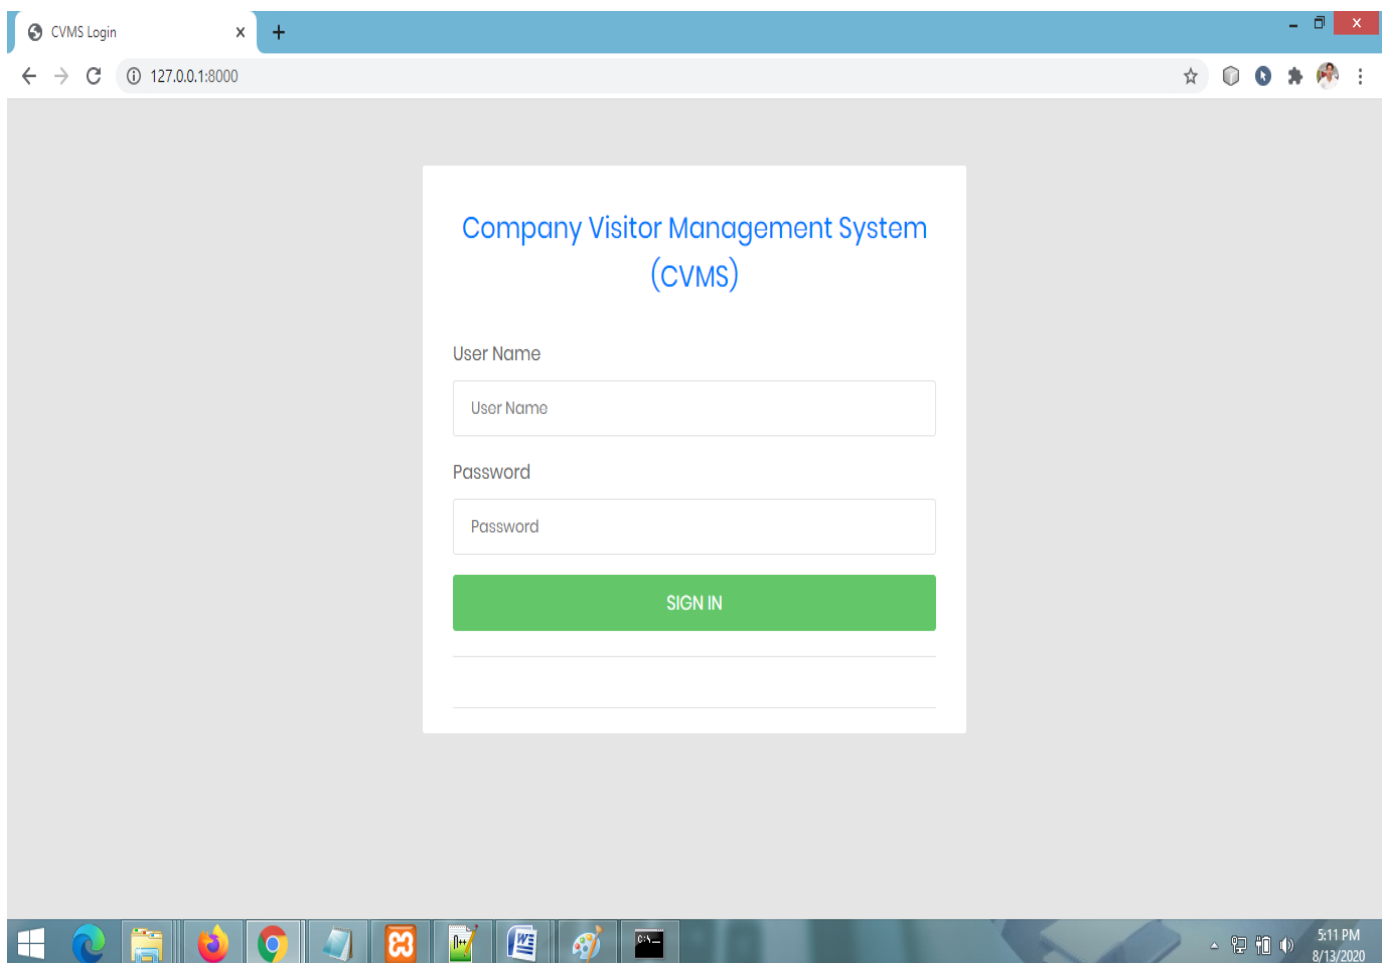

Company visitor management system

TC-4	visitor	button		search succesgully	success	
TC-4	Check for the feedback option	Click on feedback option	None	The Feedback of customer should be visible	The Feedback of customer are visible	PASS
TC-5	Check for Logout button	Click on logout button	None	Logout button should be active and visible	Logout button is active and visible	PASS

RESULT

Working Module

HOME PAGE

The screenshot shows a web browser window with the title 'CVMS Login'. The address bar displays '127.0.0.1:8000'. The main content area features a login form for the 'Company Visitor Management System (CVMS)'. The form includes a 'User Name' label and input field, a 'Password' label and input field, and a green 'SIGN IN' button. Below the button are two horizontal lines for additional input. The browser's taskbar at the bottom shows various application icons and the system clock indicating 5:11 PM on 8/13/2020.

MANAGE VISITOR PAGE

The screenshot displays a web browser window with the title 'CVMS Visitors'. The address bar shows the URL '127.0.0.1:8000/manage_visitor'. The page features a sidebar with navigation links: 'Dashboard', 'New Visitor', 'Manage Visitors', and 'Visitors B/w Dates'. The main content area has a search bar labeled 'Search by names & mobile number...' and a user profile 'Admin'. Below the search bar is a table with the following data:

S.NO	Full Name	Contact Number	Email	Action
1	Pankaj Panjwani	9229465037	pankajpanjwani42@gmail.com	
2	Ashok Panjwani	8602768211	ashok432@gmail.com	
3	Rahul Kumar	7229874321	rahul123@gmail.com	
4	Raja Kumar	9229465055	raja432@gmail.com	

The Windows taskbar at the bottom shows the time as 5:23 PM on 8/13/2020, along with various application icons.

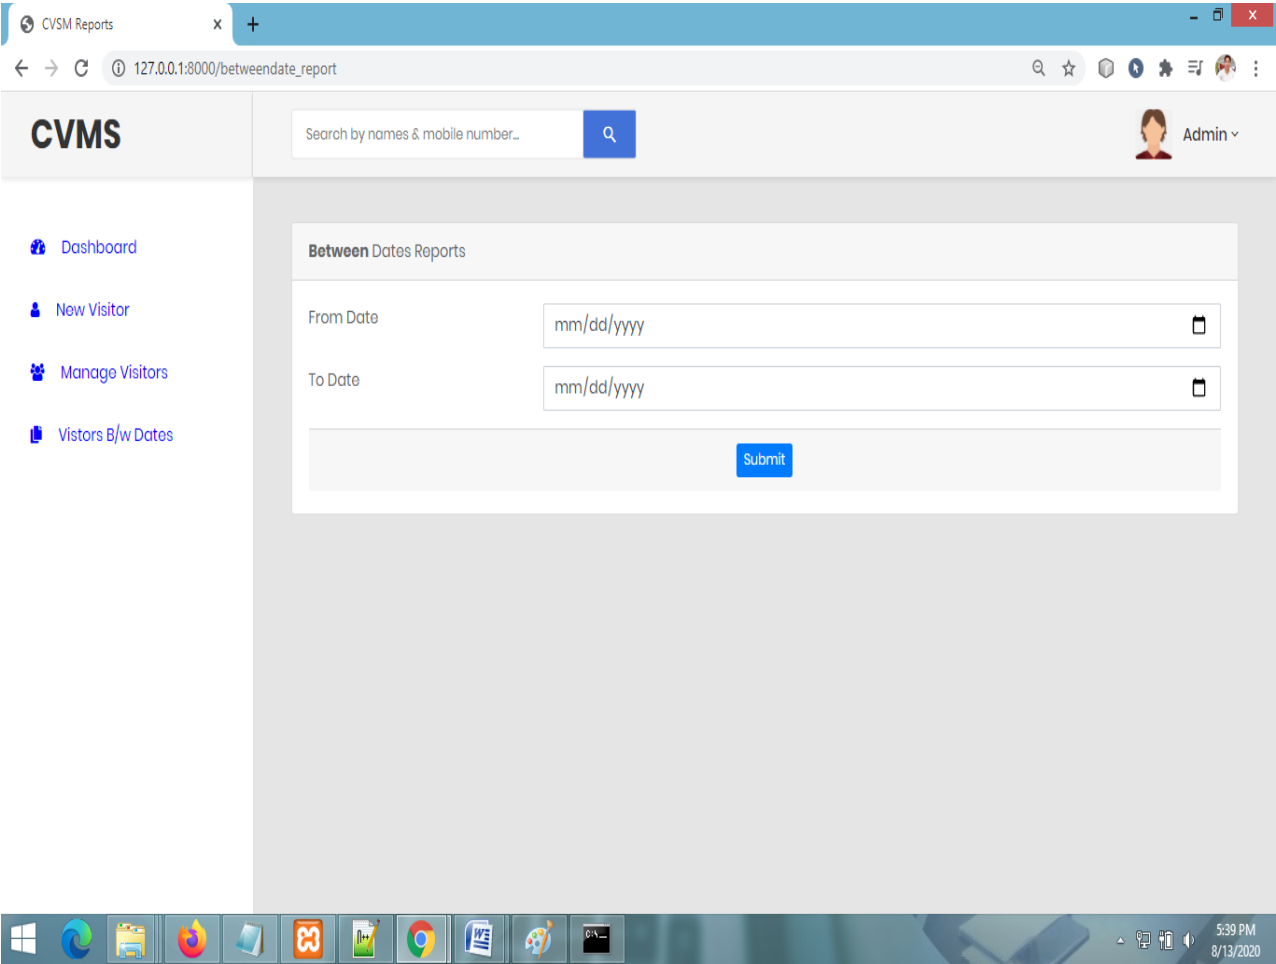

VIEW VISITOR DETAIL PAGE

The screenshot displays the CVMS web application in a browser window. The browser's address bar shows the URL `127.0.0.1:8000/visitor_detail/1`. The application's header includes the 'CVMS' logo, a search bar with the placeholder text 'Search by names & mobile number...', and a user profile icon labeled 'Admin'. The left sidebar contains navigation links: 'Dashboard', 'New Visitor', 'Manage Visitors', and 'Visitors B/w Dates'. The main content area, titled 'Visitor Details', contains a table with the following information:

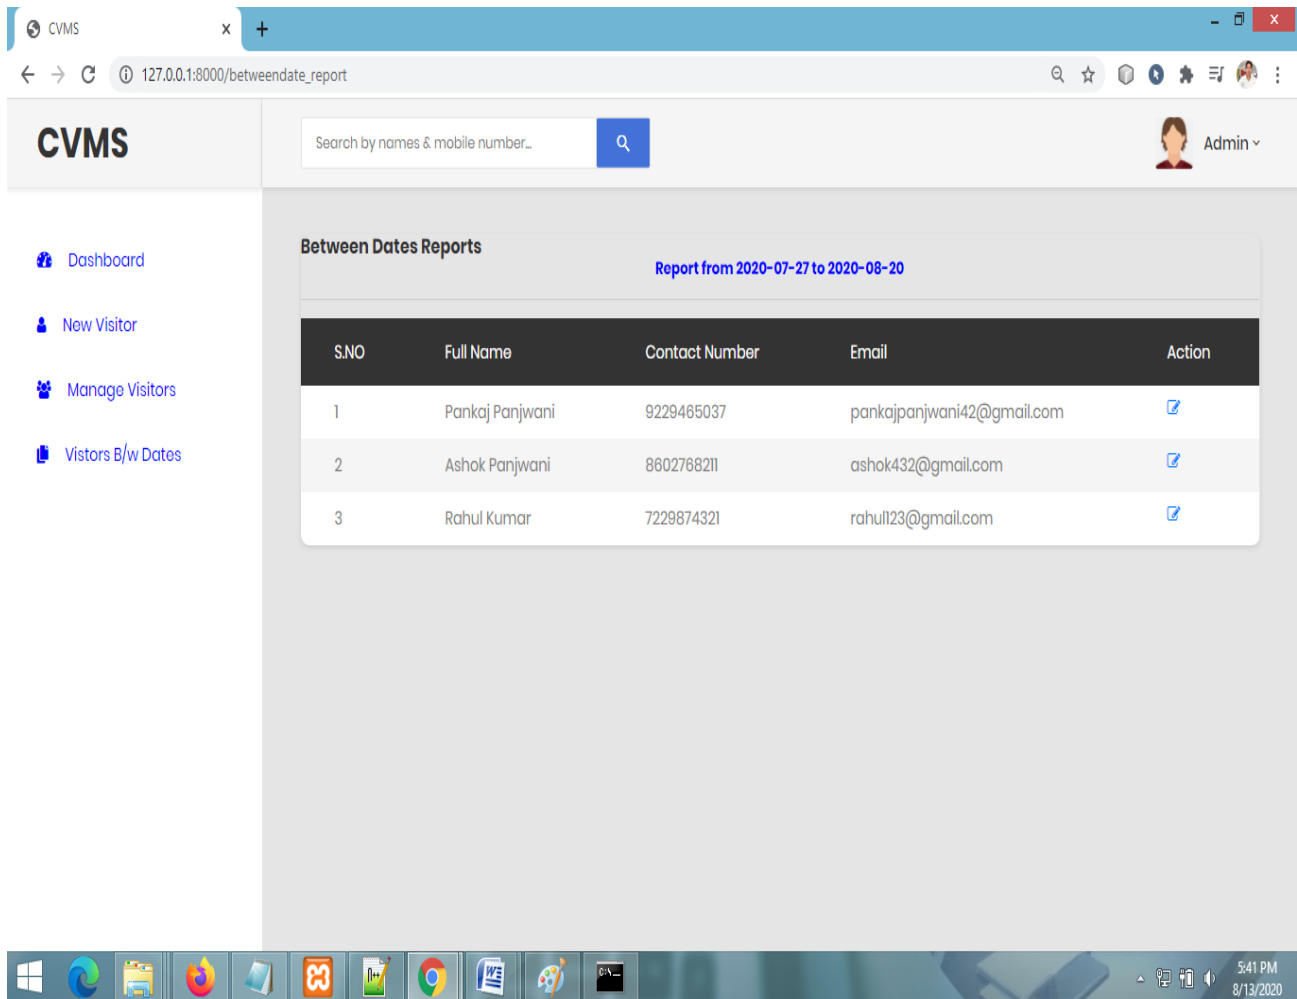

Full Name	Pankaj Panjwani
Email	pankajpanjwani42@gmail.com
Mobile Number	9229465037
Address	Indrapuri C Sector
Whom to Meet	Harish Panjwani
Department	Computer
Reason to Meet	Hardware Service
Visiting Date	Aug. 2, 2020
Visitor Entering Time	17:00
Outing Remark	Work Done
Out Time	17:30

The Windows taskbar at the bottom shows the system time as 5:28 PM on 8/13/2020, along with various application icons.

ADVANTAGE

“Company Visitor Management System” provides various features, which complement the information system and increase the productivity of the system. These features make the system easily usable and convenient. Some of the important features included are listed as follows:

- Intelligent User Forms Design
 - Data access and manipulation through same forms
 - Access to most required information
- Data Security
- Restrictive data access, as per login assigned only.
- Organized and structured storage of facts.
- Strategic Planning made easy.
- No decay of old Records.
- Exact financial position of the business.

CONCLUSION

The project entitled “Online Company Visitor Management System” is developed using HTML, CSS and Bootstrap as front end and Python Django and Sqlite database in back end to computerize the process of company visitor management. This project covers only the basic features required.
